

iCurl Perming Device Assemble Guide

iCurl Device Parts and Step-by-Step Reference :

Place tint pad under the eye & ensure that the pad covers the bottom lashes to isolate them.

Remove eye make up with BelmaRemove. Apply a thin layer of Belmashield to the under eye area.

Apply firm pressure to the U-Frame and slide up the cover vent.

Gently lift & hold the eyelid to elevate the lashes. Position the curved plate close to the base of the lashes.

Then clip up the latch until it's secured.

Slide the cover vent all the way up to neatly hold the lashes in place between the cover vent and the curved plate.

Problem Solving for uncurl or overly curl eyelashes

Too curly

Apply appropriate Perm Lotion on Mini Lash Comb to make the eyelashes straight and appropriate Setting Lotion from the base of the eyelashes, repeat 2-3 times, if the eyelashes are too curly.

Not curly enough

If the eyelashes are not curly enough, apply appropriate Perm Lotion on Mini Lash Comb to press the eyelashes 1-2 minutes and repeat the same process with Setting Lotion.

Apply appropriate Perm Lotion on Mini Lash Comb.

Illustration

Apply appropriate Setting Lotion on Mini Lash Comb.

Apply a generous amount of perm lotion onto the back of the cover vent using a cotton tip. (This is the area where you can feel the small grooves)

Close the clicker and remove any excess lotion from behind the curved plate. Re-open the clicker and wipe the bottom edge of the curved plate.

Position the clicker onto the eye, slide up the cover vent and lock into place with the latch.

Leave the perm lotion to process for 7-9 minutes. 7 minutes for soft/fine hair - 9 minutes for coarse/strong hair.

Remove the clicker by releasing the latch and sliding down the cover vent. Clean off any excess perm solution from the eyelashes & wipe the clicker with a tissue, it is not necessary to wash the clicker.

Apply a generous amount of setting lotion with a cotton tip onto the back of the cover vent and repeat steps 2 & 3.

Leave the setting lotion to process for 7-9 minutes. Please ensure that you process for the same amount of time as the perm solution.

Remove the clicker and wipe the lashes clean with a damp cotton pad. A lash tint can be carried out at this point. Rinse the lashes after tinting and dry thoroughly.

Apply Elleevate Mascara or Elleeplex Serum to complete the treatment.
